Ovigue Leonard Eguriase

Professional Summary

Software Developer with years of experience architecting and shipping enterprise platforms for government agencies, multi-subsidiary conglomerates, and commercial clients. Built and deployed custom and enterprise production systems. Deep expertise in full-stack development, API design, database optimization, and delivering scalable solutions that drive operational efficiency. Adept at working with legacy systems, managing complex data migrations, and implementing business intelligence dashboards.

Experience

Software Developer Jun 2025 – Present

Havosoft Technologies

- ▶ Architected automated payroll system for Company Enterprise System handling payroll generation, payment processing and payslip distribution, reducing manual processing from **1 week** → **1 day**.
- ▶ Developed and maintained Kano MLGCA HRMS integrating staff records, promotions, attendance, validation workflows, analytics dashboards, and self-service portals. Also Implemented audit logs, activity tracking, and validation reports to support compliance and accountability in government systems.
- ▶ Metadata Identity Verification service: Built an identity verification service integrated with OSINT and identity validation services.
- ▶ Built Unity SSO Portal: a centralized Identity and Access Single Sign-On System federating authentication across multiple ERP instances and Internal company applications.
- ▶ Developed Custom Modules For ERP Systems as per business requirements.
- ▶ Collaborated with HR managers, accountants, and technical teams to gather requirements, conduct demos, and deliver production-ready solutions.
- ▶ Developed IT Assets Management Module integrated with cPanel and WordPress APIs for automated password rotation with asset expiry tracking for domains/hosting, — reducing password rotation from **1 week** → **1 day**.
- ▶ Deployed ERP systems for client organizations with SaaS multi-tenancy.
- ▶ Set up CI/CD processes and deployed multiple production systems to various hosting environments.

IT Professional/ Full-Stack Software Developer Oct 2022 – Present

Freelance

- ▶ Designed and developed backend-driven web applications for clients, including secure financial and investment platforms, implemented queued/background processing to ensure data consistency and scalability under load.
- ▶ Diagnosed and resolved hardware, software, and network issues for 20+ clients with 95% first-call resolution rate.
- ▶ Performed software installation, configuration, and updates for Windows and Linux environments.
- ▶ Set up and configured network printers, scanners, and peripheral devices with driver optimization.

Skills

Languages & Frameworks

PHP, Laravel, CodeIgniter, Python, Django, FastAPI, Kivy, Streamlit, JavaScript, HTML5, CSS3, Wordpress, Cordova, Flutter

Frontend

Bootstrap, Tailwind CSS, jQuery, AJAX, React JS, Vue JS

Databases

MySQL, Postgresql, QueryOptimization, EAV Patterns, Data Migrations

APIs & Integrations

REST APIs, GraphQL, Swagger/OpenAPI, Flutterwave, Sayswitch, Monnify, cPanel API, WordPress REST API, OAuth, Laravel Sanctum

DevOps & Infrastructure

Git/GitHub, Linux Admin, Apache/Nginx, CI/CD, Pusher, IMAP/SMTP, SaaS Multi-Tenancy, Google Cloud Platform

Enterprise Solutions

ERP Systems, HRMS, Payroll Automation, SSO/SLO, BI Dashboards, Batch Processing, ETL, Workflow Automation

Education

BSc Computer Science

University of Calabar
2024

- ▶ Provided remote and on-site technical support ensuring minimal downtime for client operations.
- ▶ Implemented multiple undergraduate project systems including full-stack web applications with MySQL databases and responsive frontends.
- ▶ Delivered custom software solutions for small businesses including inventory management and client relationship systems.

Computer Operator / IT Support NOVEMBER 2020 – OCTOBER 2022

NOL International Computer Institute

- ▶ Operated computer systems and performed preventive maintenance on hardware and IT equipment.
- ▶ Conducted data entry operations using Microsoft Office Suite (Word, Excel, PowerPoint, Access).
- ▶ Provided computer literacy training to students covering basic operations, internet usage, and office applications.
- ▶ Monitored system performance and resolved technical issues to ensure optimal uptime.
- ▶ Installed and configured operating systems, application software, and printer drivers.

PORTFOLIO PROJECTS & SYSTEMS

Indoor Navigation — *Python, OpenCV, Google vision API OCR*

Indoor Navigation for large buildings using the perspective correction, text recognition, lot segmentation with labeling, the A* shortest path algorithm was used to implement the routing of the navigation system.

Nearhood Neighborhood Intelligence — *Python -Django, PostgreSQL -PostGIS, Open Street Maps -Overpass Turbo*

Neighborhood intelligence & community errand platform.

Fraud App Detection — *Python, ML, Streamlit, Google play store API*

Machine learning system for detecting fraudulent apps on Google play store using sentiment analysis on user reviews.

MiniSocial Network — *PHP, Laravel, MySQL, Bootstrap*

Social networking application with user profiles, posts, comments, likes, and real-time notifications.
